DEMINING  
Remote controlled  
tracked carriers

# DEMINEING VEHICLE

Roads, paths, agricultural and forest areas with the presence of mines: the FAE Demining line is aimed at organizations and institutions that work to reclaim and restore otherwise dangerous and unusable land to civil use.

The PT-300 D:Mine remote controlled tracked carrier is designed to clear the ground of deep explosive ordinance. It's built to withstand extreme stress and to be maneuvered at a substantial distance for the safety of the operator.

### APPLICATIONS:

- Clearing land of anti-personnel mines
- Clearing land of anti-tank mines
- Battle area clearance operations (BAC) to eradicate unexploded ordnances (UXO)

### DIMENSION

## NEW REMOTE CONTROLLED TRACKED CARRIERS

# PT-300 D:MINE

### Demining vehicle.

The PT-300 D:Mine is a remote controlled tracked carrier for clearing mine fields that is effective against anti-personnel and anti-tank mines. This vehicle works in the toughest conditions, including rough terrain, steep slopes up to 45°, swampy land, and in areas with dense vegetation. Some of its main technical features include a super sturdy structure with an oscillating undercarriage, the high-performing

CAT C71 Acert engine, and a lower operating weight. The ergonomic remote control makes it possible to safely perform all functions. The carrier can be equipped with a demining head or another type of FAE attachment, like a forestry mulcher, tiller, stump cutter or dozer blade.

#### MULTI-TASKING

The construction features of the FAE PT-300 D:Mine enable it to accommodate a demining tiller with fixed-tooth or a demining flail heads, forestry mulchers (also with the exclusive Sonic technology), forestry tillers, stump cutters, or dozer blades.

#### POWERFUL

It has the flexibility and reliability of one of the world's most widely used six-cylinder engines. The Caterpillar C71 Tier 4 Final/Stage V engine delivers 302 hp, and 275 hp with the Tier 3/Stage III version. It offers superior performance and a global support network.

#### SOLID

The frame was built to withstand extreme stress. The undercarriage was designed for maximum performance. The technology of the oscillating undercarriage provides better impact absorption.

#### D:Mine Rotor with flails (Optional)

#### D:Mine Rotor with G/3 teeth

#### SAFE

The ergonomic remote control with a large 3.5" display makes it possible to safely manage all vehicle and head functions. The transmission frequency at 2.4 GHz ensures optimal connection at a safe distance.

#### TECHNOLOGICAL

The PT-300 D:Mine's electronically managed hydrostatic transmission is the perfect solution for optimal power transmission and long-term reliability. Innovative functions like Load Control and Floating ensure high efficiency in any condition.

### MAIN OPTIONS

Rear winch with 6 t pulling power

Chain Guides

Rock guards

Proportional and reversible radiator fan

**275 hp**  
CAT ENGINE  
TIER 3 / STAGE III A

**302 hp**  
CAT ENGINE  
TIER 4 FINAL / STAGE V

### OPTIONS

Rear winch - rated towing capacity: 6t	Service light (service package)
Chain guides	Oil top-off pump (service package)
Rock guards	Cab (full optional)
Proportional and reversible radiator fan	Custom color
Pre-heating system for engine and hydraulic oil
