REMOTE CONTROLLED PRODUCTIVITY

BL2/RCU75

Forestry mulcher with Bite Limiter technology

High productivity and durability are key features of the BL2/RCU forestry mulcher with Bite Limiter rotor,

which can mulch vegetation up to 6 inch in diameter.

PMM/RCU75

Flail mulcher with swinging hammer rotor for RCU75.

The PMM/RCU75 is a high-efficiency forestry mulcher for vegetation and small shrubs up to 3.1 inches in diameter.

SCL/RCU75

Stump cutters for the RCU75 remote controlled tracked carrier

The SCL/RCU75 can shred large stumps and roots up to 20 inches deep. Lateral oscillation with proportional hydraulic control makes it possible to work on a large area without moving the vehicle.

RCU75

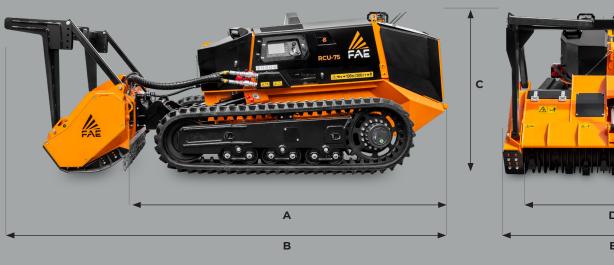

Working in hard-to-reach areas or steeply sloping terrain requires special equipment that ensures user safety and operating efficiency. The RCU75 is a compact and powerfull, remote controlled tracked carrier that is the result of merging FAE's extensive experience in designing tracked carriers for the PT series and remote-control systems for the vehicles in our Demining line. The RCU75 is designed for green area's maintenance work both in the forestry and road sectors. Its versatility makes it well suited for working in hilly and wooded areas, near railroad tracks, power lines, gas and oil pipelines, gardens, and near roads, highways, canals, rivers and lakes.

APPLICATIONS:

Forestry maintenance Plantation and crop maintenance Canals, rivers, ponds overgrowth cleanup Power lines, oil & gas, R.O.W. maintenance Roadside and railway vegetation maintenance

COMPACT, REMOTE CONTROLLED TRACKED CARRIER FOR FORESTRY, AGRICULTURAL AND MUNICIPAL WORK

RCU75

The RCU75 is a compact, powerful FAE tracked carrier that shreds branches and wood pieces, grass, and small shrubs. It can also cuts stumps when outfitted with an SCL/RCU75 head. It is equipped with a 74-hp Kohler engine. The RCU75 can work on steep slopes up to 55°. The heavy-duty undercarriage features a hydraulic variable track system with independent undercarriage frames for maximum stability on steep

HEAVY DUTY UNDERCARRIAGE

Hydraulic variable track system with independent undercarriage frames and an automatic tensioning system built to work in the toughest conditions, thanks to a rubber tracks structure, roller system and idlers.

terrain. The high-profile rubber or steel tracks combined with the undercarriage's multiple roller system provide unbeatable traction. The dual hydrostatic transmission makes it easier to manage traction and the attachment.

EFFICIENT AND RELIABLE TRANSMISSION

Electronically controlled piston pumps combined with a dedicated electronic control unit provide an integrated technological system. The result is high performance and long-term reliability, as well as simple and intuitive operation.

STEEL TRACKS

High-profile rubber tracks and roller system Combined aluminum cooler anti-clogging fins style Proportional and reversible fan system with hydraulic control Ergonomic joysticks controls LCD color 4.3" display on remote control unit Double remote-control batteries and on board battery charger LCD color 7" display on board LED working light

PROFESSIONAL REMOTE CONTROL

The ergonomic remote control with a large 4.3" display makes it easy to manage all vehicle and attchment functions. Customizable function keys. 2.4 GHz transmission frequency.

SELF-CLEANING RADIATOR

The aluminum radiator combined with anticlogging fins is paired with a proportional and reversible fan to keep the radiator clean and efficient at all times, consistently maintaining peak performance and reducing the need for upkeep.
